Payment policy, Class cancellation policy, Waiver (comming soon)

After registering client should receive a confirmation email with all the details typed into a form plus an information that the full payment must be made by cash after the first classes.

REGISTRATION SYSTEM

I need a simple registration system for my classes, it needs to be very easy to use because I'm not very technical person.

I'm running fall, winter, spring and summer classes - each lasting for 8 weeks, so once every 3 months I need to be able to update my classes and open registration for people. I need to update following things for each class:

name of class

description

price

start and finish date

day of week and start time

maximum number of students for the class (the registration should close once the class is full)

I also need to be able to add, edit and delete enrolled people and to keep track of who has payed for the class (they will be paying by cash) - so maybe there should be a field beside the name so I can tick it or sth when they pay. At the moment I don't want to take online payments (only cash) - but the system should be open if I want to change it in the future.
