2	\$600 + theme	recommends this theme: http://preview.themeforest.net/item/smart-learning-responsive-education-theme-for-wordpress/full_screen_preview/15550221?_ga=1.254298440.1567743336.1472441208
3	\$2500-\$3500	
4	\$2430	\$2150 + \$279.95 for event plugin + stock photos
5	\$2,500-\$3,500	
6	\$3000-5,000	
7	\$3250 - \$3700	Web Design, Development and Implementation: \$2,850.00, Logo Creation: \$400, Professional WordPress Hosting & Cloud Caching \$450/ year, Premium Malware / Intrusion Monitoring / Cleanup & Site Backup Services 85\$/ year,
8	\$3500	If you have some readymade WordPress theme in your mind, share us the link and we can visualise the efforts of integration, customisation. It may save few hundred dollars in development but mostly we prefer Custom design and development to give unique feel to each website and also maintenance of the same is easy as we may need to do lot of changes and customizations in the readymade theme to make it fit as per your exact needs. Project would need a designer, 1 WordPress developer, 1 part time tester & Project Leader.
9	\$3500	Our website normally start at \$2500 and with the registration function, another \$1000
10	\$3800-\$4200	
11	\$4,000 - \$5,000	a logo design and 8-page website with a class registration system
12	\$5000	information from their website: I do have a \$2,500 minimum, which is the development cost, on customized websites. Custom home page designs start at \$1,100 and each inside page is \$400. Development ranges from \$2,500 – \$5,000 depending on the type of development that's needed. I have gone as low as \$1,500 provided a fitting circumstance.
13	> \$5000	I currently have a minimum engagement fee of \$5,000
14	\$5000 - \$9000	information from their website: simple but effective site (no ecommerce) : \$4,800-\$8,999, moderate to complex site : \$9,000-\$12,999
15	\$6,000 - \$7,000	Our basic pricing for a site starts at \$6,000.
16	> \$6000	information from their website: Our website projects start at \$5,997 and range upward depending on complexity
17	\$6,500 - \$8000	Logo development: \$1500-\$2000, Layout/design of website, 10 or 11 pages using 2 or 3 basic layouts: \$2500, Coding/HTML: \$2500-\$3500, Our hourly rate is \$100, Monthly maintenance is typically \$90 to \$180/month
18	\$7500	can give you a custom designed and developed WordPress site, It will take approximately 6 - 8 weeks
19	\$8k-\$10k	
20	\$12,000 to \$16,000 or \$5,000 to \$7,000	\$12,000 to \$16,000 Create a custom WordPress WooCommerce website that will allow you to manage classes like online products. Users could add each class to their cart and register in a manner similar to checking out off an online store. This is a good solution if you want the options to later process payments online. \$5,000 to \$7,000 - Create a semi custom WordPress build on our shared WordPress Platform. The primary differences between this option and option 1 is that classes descriptions would be managed as page and signing up would require users to choose a class from the options available on the sign up form or forms
21		We're a bit too early on to talk about pricing as I know almost nothing about your website, I can tell you that typically full site builds are somewhere around the \$3K (USD) mark.
22		Typically, a full website with registration features, e-commerce, asset creation (like a logo and copyright-free images) takes at least 6 months to develop, test and deploy. Without further detailed discussions about your needs and expectations for a website, I would guess you're looking at a starting cost \$10k or more, but that is only a guesstimate.
23		information from their website: My minimum project budget is \$2K USD
